Serial No.: 09/514,513

In the Claims

Please amend the claims as follows.

- 1. (Original). A plant cell comprising a nucleic acid molecule encoding a chimeric isoprenoid synthase polypeptide that comprises an asymmetrically positioned homologous domain and that catalyzes the production of an isoprenoid reaction product that is not produced when said domain is positioned at its naturally-occurring site in an isoprenoid synthase polypeptide.
- 2. (Original). The plant cell of claim 1, wherein said chimeric isoprenoid synthase polypeptide catalyzes at least two different isoprenoid reaction products.
- 3. (Currently amended). A plant cell comprising a nucleic acid molecule encoding a The plant cell of claim 1, wherein said chimeric isoprenoid synthase polypeptide is chosenselected from the group consisting of (a) the tobacco-Hyoscyamus CH4 chimeric isoprenoid synthase; (b) the tobacco-Hyoscyamus CH10 chimeric isoprenoid synthase; (c) the tobacco-Hyoscyamus CH11 chimeric isoprenoid synthase; (d) the tobacco-Hyoscyamus CH12 chimeric isoprenoid synthase; (e) the tobacco-Hyoscyamus CH13 chimeric isoprenoid synthase; and (f) the tobacco-Hyoscyamus CH14 chimeric isoprenoid synthase.
- 4. (Original). The plant cell of claim 1, wherein said chimeric isoprenoid synthase polypeptide catalyzes the production of an antifungal agent.
- 5. (Original). The plant cell of claim 1, wherein said chimeric isoprenoid synthase polypeptide catalyzes the production of an antibacterial agent.
- 6. (Original). The plant cell of claim 1, wherein said chimeric isoprenoid synthase polypeptide catalyzes the production of an antitumor agent.

Serial No.: 09/514,513

7. (Original). A transgenic plant comprising a nucleic acid molecule encoding a chimeric isoprenoid synthase polypeptide that comprises a domain from a first isoprenoid synthase joined to a domain from a second, different isoprenoid synthase, whereby said chimeric isoprenoid synthase polypeptide catalyzes the production of an isoprenoid reaction product that is not produced in the absence of said domain from said second, different isoprenoid synthase, wherein:

- (a) said first isoprenoid synthase catalyzes the production of an isoprenoid reaction product of said first isoprenoid synthase, but does not catalyze the production of an isoprenoid reaction product of said second, different isoprenoid synthase;
- (b) said second, different isoprenoid synthase catalyzes the production of an isoprenoid reaction product of said second, different isoprenoid synthase, but does not catalyze the production of an isoprenoid reaction product of said first isoprenoid synthase;
- (c) said domain from said first isoprenoid synthase occupies a first position in said chimeric isoprenoid synthase polypeptide, said first position in said chimeric isoprenoid synthase polypeptide corresponding to a position in said first isoprenoid synthase occupied by said domain from said first isoprenoid synthase; and
- (d) said domain from said second, different isoprenoid synthase occupies a second position in said chimeric isoprenoid synthase polypeptide, said second position in said chimeric isoprenoid synthase polypeptide corresponding to a position in said second, different isoprenoid synthase occupied by said domain from said second, different isoprenoid synthase.
- 8. (Original). The transgenic plant of claim 7, wherein said chimeric isoprenoid synthase polypeptide catalyzes at least two different isoprenoid reaction products.

Serial No.: 09/514,513

- 9. (Original). The transgenic plant of claim 7, wherein said domain from said second, different isoprenoid synthase comprises a ratio-determinant domain of said chimeric isoprenoid synthase polypeptide.
- 10. (Original). The transgenic plant of claim 9, wherein said ratio-determinant domain of said chimeric isoprenoid synthase polypeptide determines the ratio of isoprenoid reaction products of said chimeric isoprenoid synthase polypeptide.
- 11. (Original). The transgenic plant of claim 7, wherein said domain from said first isoprenoid synthase is from a plant isoprenoid synthase and said domain from said second, different isoprenoid synthase is from a plant isoprenoid synthase.
- 12. (Currently amended). A transgenic plant comprising a nucleic acid molecule encoding a The transgenic plant of claim 7, wherein said chimeric isoprenoid synthase polypeptide is chosenselected from the group consisting of (a) the tobacco-Hyoscyamus CH4 chimeric isoprenoid synthase; (b) the tobacco-Hyoscyamus CH10 chimeric isoprenoid synthase; (c) the tobacco-Hyoscyamus CH11 chimeric isoprenoid synthase; (d) the tobacco-Hyoscyamus CH12.chimeric isoprenoid synthase; (e) the tobacco-Hyoscyamus CR13 chimeric isoprenoid synthase; and (f) the tobacco-Hyoscyamus CH14 chimeric isoprenoid synthase.
- 13. (Original). The transgenic plant of claim 7, wherein said chimeric isoprenoid synthase polypeptide catalyzes the production of an antifungal agent.
- 14. (Original). The transgenic plant of claim 7, wherein said chimeric isoprenoid synthase polypeptide catalyzes the production of an antibacterial agent.
- 15. (Original). The transgenic plant of claim 7, wherein said chimeric isoprenoid synthase polypeptide catalyzes the production of an antitumor agent.
